

Amendments to the Specification:

This amended paragraph [0106] corrects a spelling error (or ~~of~~) in the last line:

[0106] If decision box 73 in Fig. 25 determines that no picture-data records are pending, processor 50 proceeds to decision box 160 which checks button-switches and other manual inputs to determine if a player has requested the replay option. If yes, process 163 sets a pointer to the beginning (oldest record) of replay table 165 discussed above, and process 158 generates a miniature likeness from data in replay table 165. If decision box 161 determines that the player selected the fast-forward option to return picture-by-picture to the latest likeness picture, process 164 adds 1 (one) to the table pointer which points to the next data record in replay table 165. If decision box 161 determines that the player has not selected either the replay or ~~of~~ fast-forward options, control passes to process 65 discussed above.
